

INVISALIGN:

IT'S NOT JUST A BUNCH OF HYPE

8 Important Questions to Ask Yourself - *Before* You Commit

Straight teeth are more than just good looks.

You may have delayed straightening your teeth because you think it's just for cosmetics but you may be surprised to find out that there are some great health benefits that make it all worthwhile.

As a matter of fact, these benefits will improve your quality of life AND you'll look stunning, have more confidence, and finally love every #selfie.

Having properly aligned teeth:

- ✓ Make it easier to keep your teeth clean
- ✓ Reduce your chance of cracked or broken teeth
- ✓ Decrease your risk of periodontal disease
- ✓ Improve your overall health

“Nice to meet you”

Most people say they notice a smile
FIRST when they meet someone new.

8 questions to ask yourself:

1 Is there anything about your smile that you would like to improve?

Invisalign is a perfect solution for patients with gapped teeth, crowded teeth, overbite, underbite or crossbite.

2 Do you prefer to brush and floss as you normally do?

Keep things simple with Invisalign. Simply remove your aligner after each meal, then brush and floss as you already do!

3 Would shorter, less frequent appointments benefit you?

If you have a busy schedule, Invisalign is a good choice because individual appointments can be as short as 15 minutes! Your dentist will check the progress of your treatment, give you new aligners, and you'll be on your way.

SOURCE

Fewer Appointments!

Free up your busy schedule with less office visits (only every 4-6 weeks).

4 Do you prefer a less noticeable treatment?

If you'd rather others didn't notice your treatment, Invisalign is your best choice since it uses clear aligners to gently move your teeth.

5 Do you have metal allergies?

Invisalign is the only metal free choice to straighten teeth.

6 Do you want the best value in the least amount of time?

Invisalign treatment can be shorter, and therefore less expensive. Most patients who choose Invisalign feel it offers the greatest value because it offers key benefits other treatment options simply don't.

7 Do you have any special occasions coming up?

Invisalign gives you the option of removing your aligners for any photo ops.

8 Do you want to be able to eat anything you normally would?

Since Invisalign is removable, you won't have any dietary restrictions because of your treatment.

Eat what you want!

With Invisalign, you can still eat anything you choose.

ENOUGH WAITING.

GET STARTED

- 1** Visit our website, schedule your consultation.
Don't worry, you aren't obligated to do anything.
- 2** Come in and we'll discuss your options.
A simple exam is all it takes to begin.
